Airport Master Planning 101

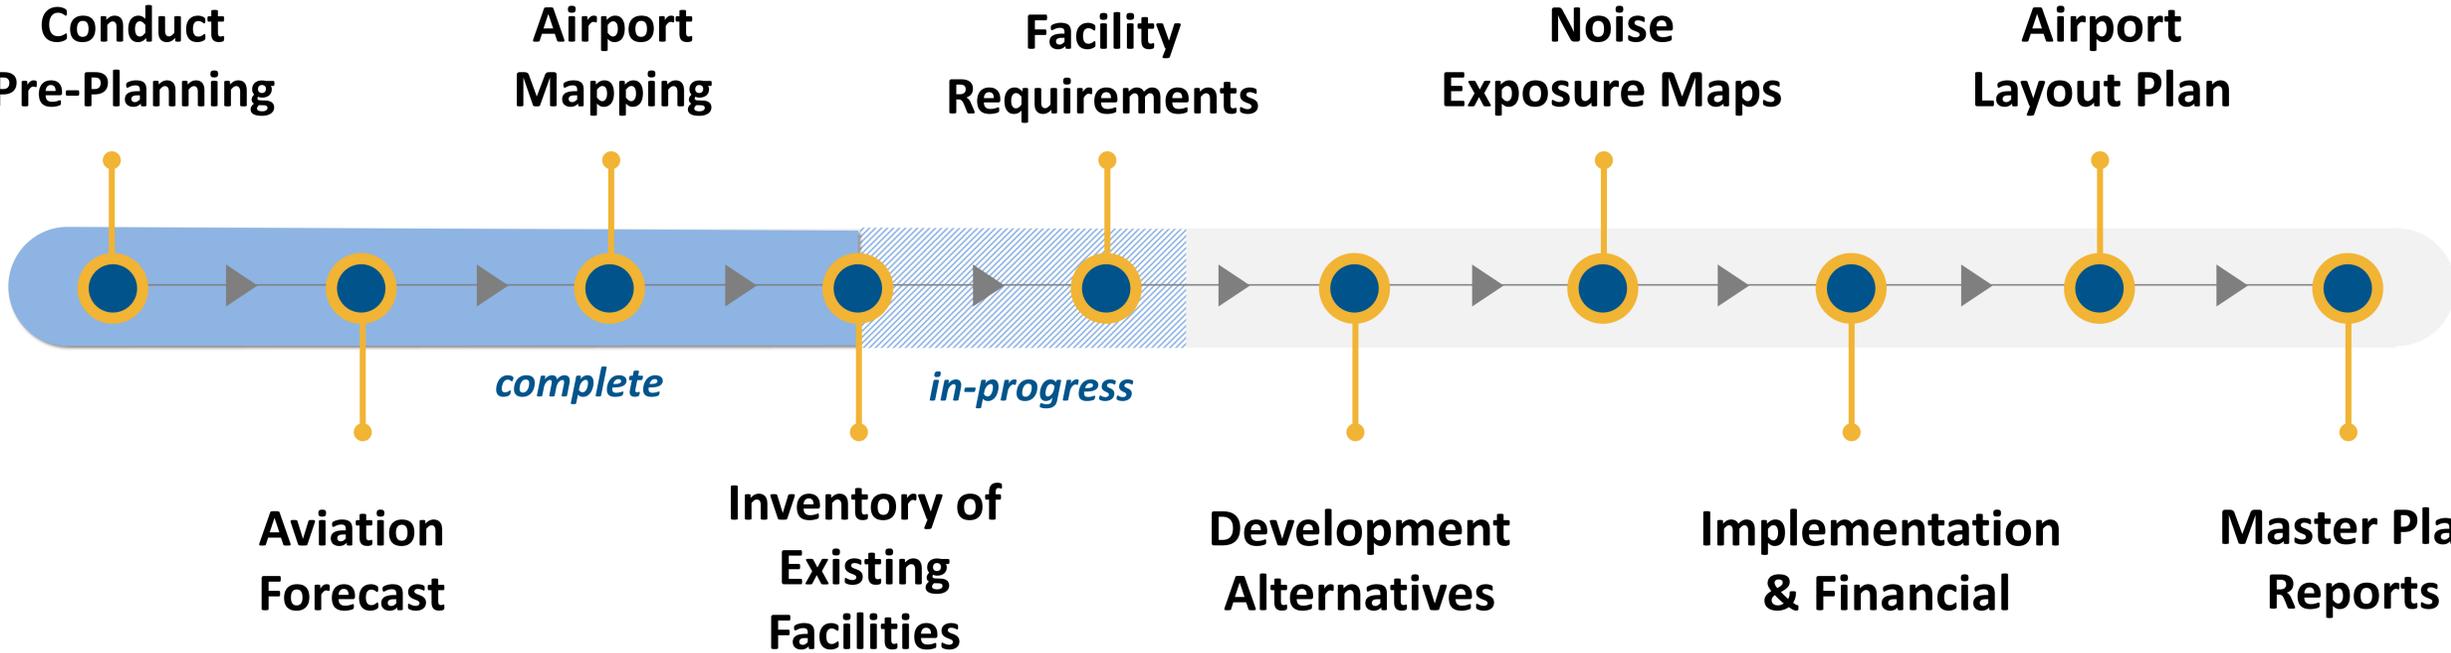

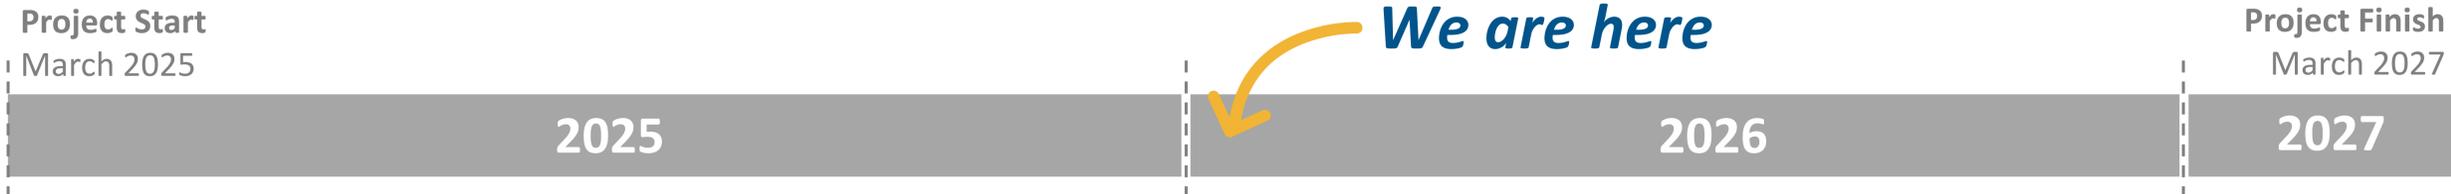

- Incorporates changes since the last Master Plan (2020) and recent planning efforts
- Results in recommendations for the layout of future airport facilities
- Provides a long-term vision for future development (+20 years)
- Identifies projects to implement based on demand
- Results in FAA-approved forecast, critical aircraft, and Airport Layout Plan (ALP)
- Includes back-up justification for proposed new development depicted on the ALP

Driven by
Federal Aviation
Administration (FAA)
Advisory Circular

BNA[®] Master Plan Process

Process driven by FAA Advisory Circular 150/5070-6B

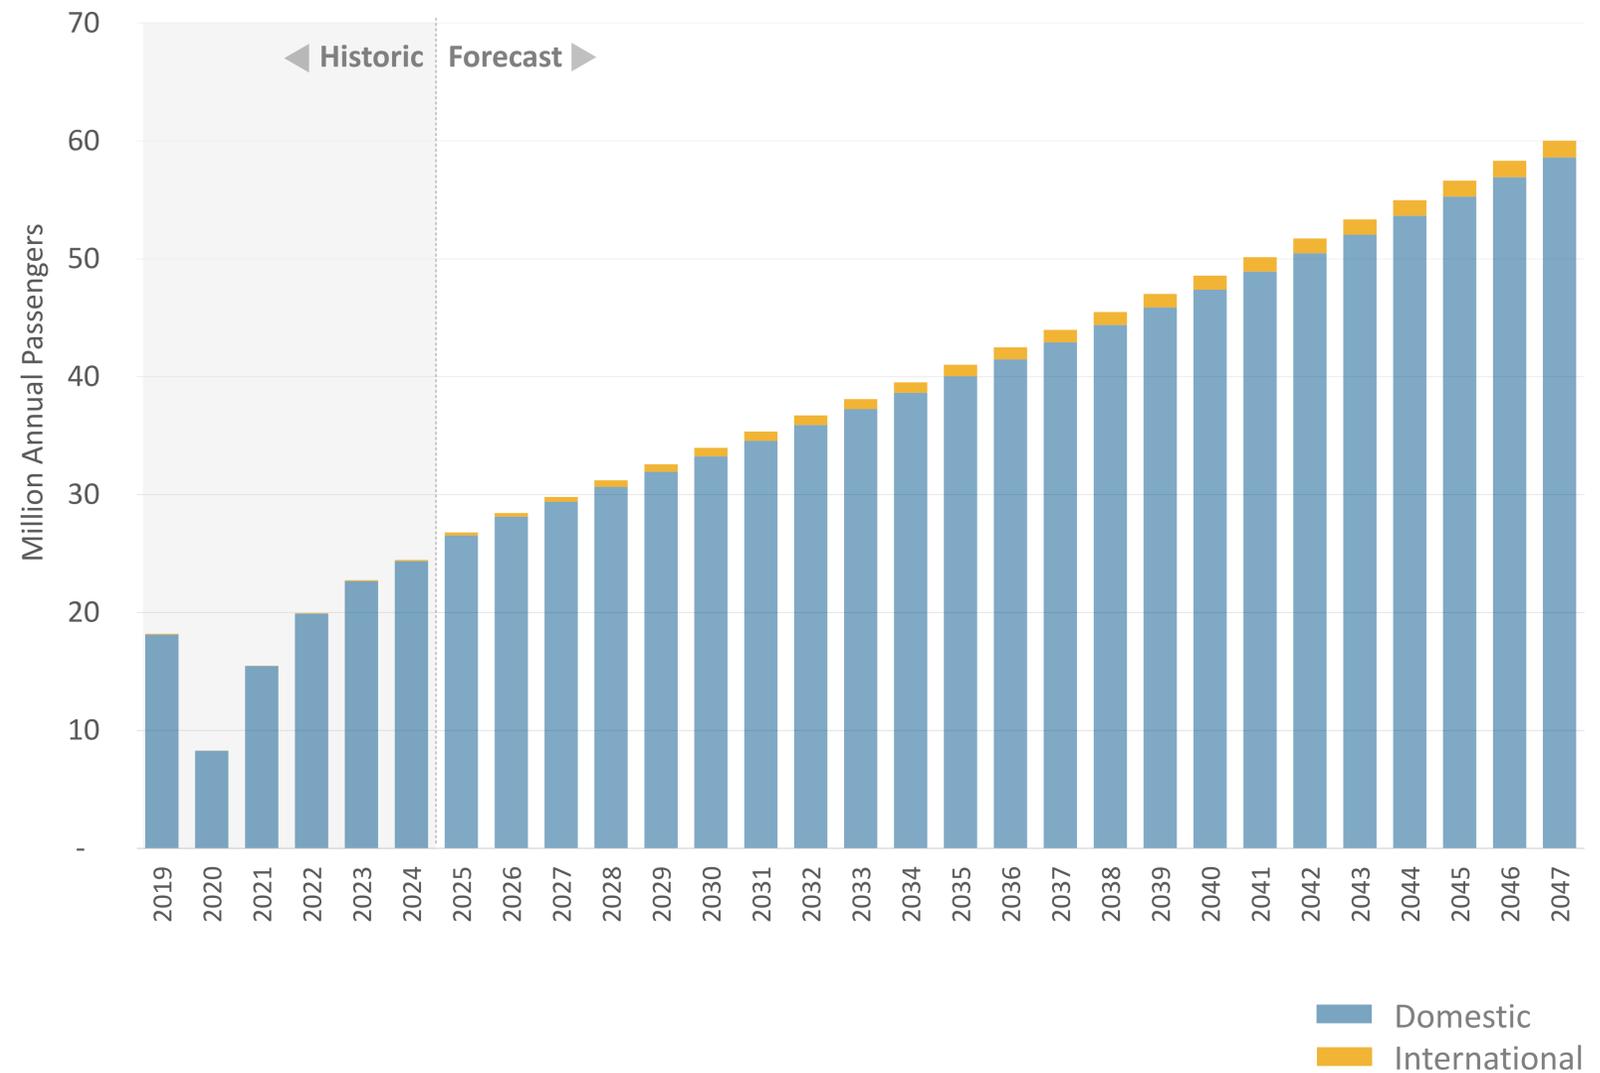

BNA[®] Master Plan Forecast Summary

Passenger Forecast

	2024	2047
DOMESTIC PASSENGERS	24.4	58.6
INTERNATIONAL PASSENGERS	0.2	1.4
TOTAL PASSENGERS	24.6	60.0

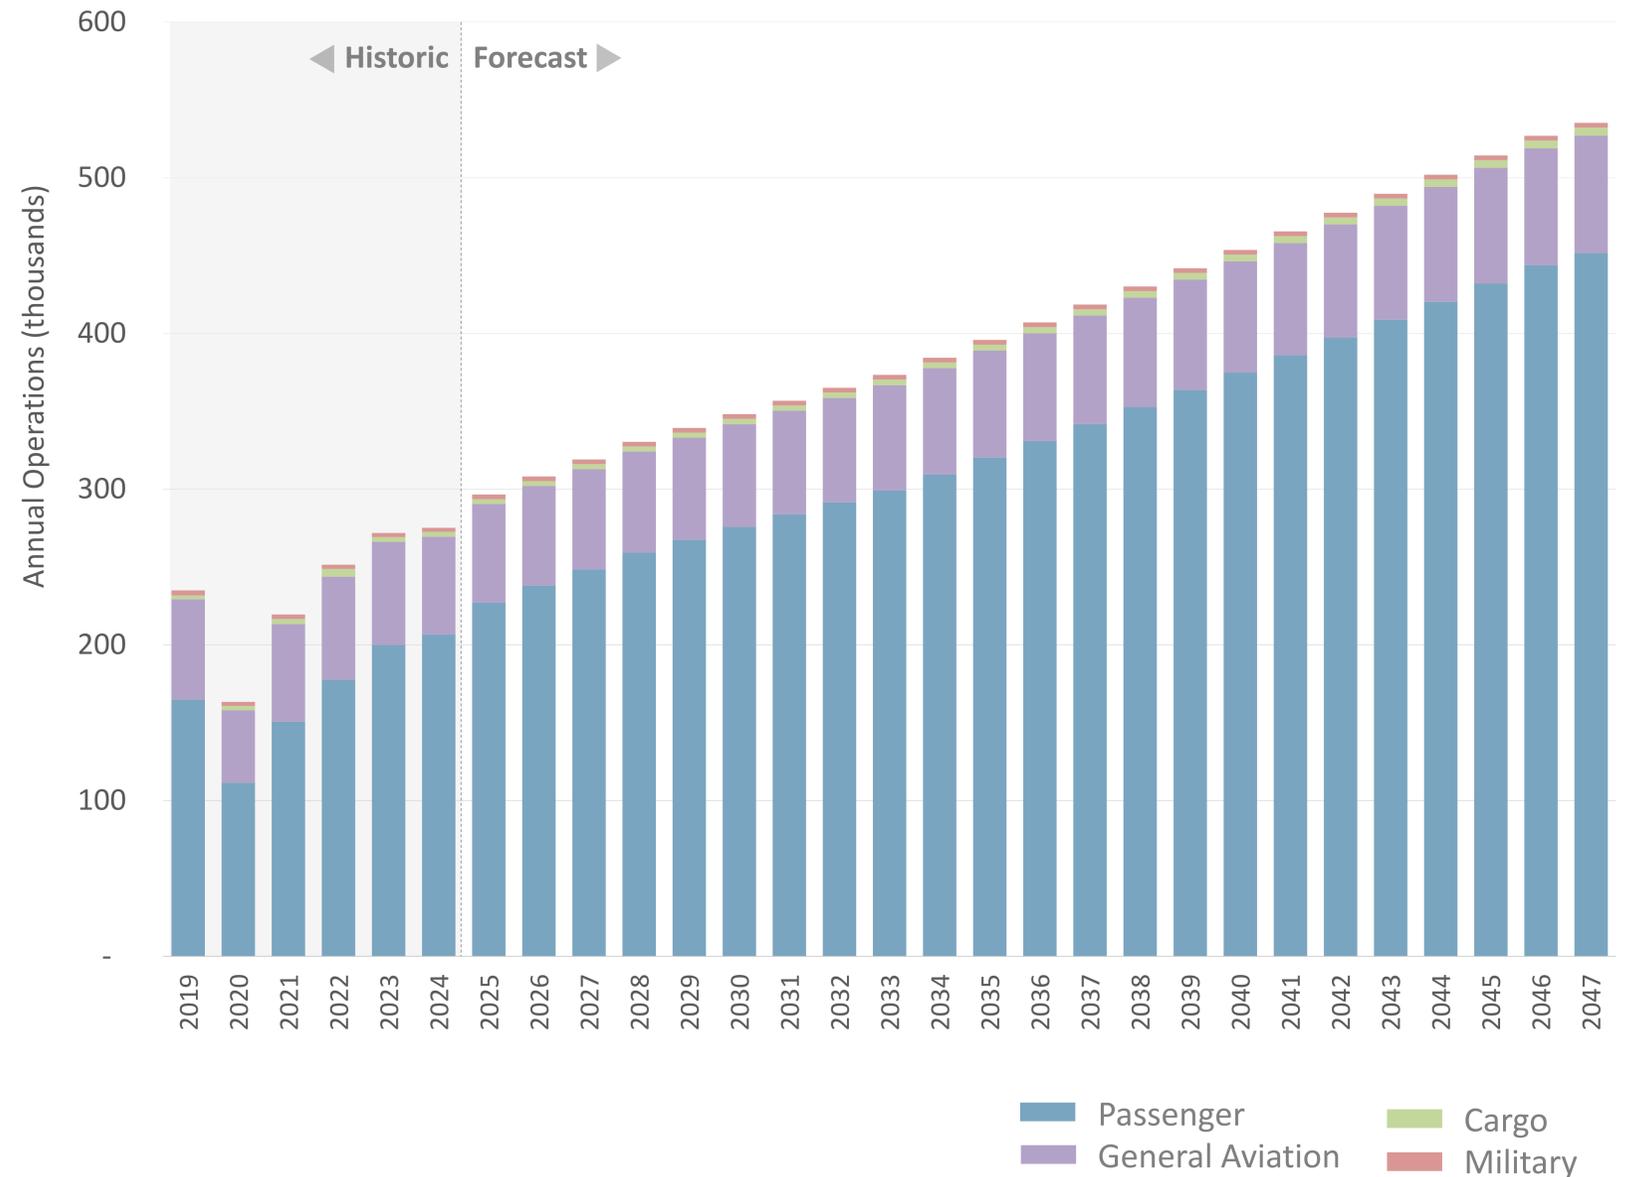

Totals in Millions

BNA[®] Master Plan Forecast Summary

Operations Forecast

	2024	2047
PASSENGER OPERATIONS	206,567	451,500
GENERAL AVIATION OPERATIONS	62,899	75,500
CARGO OPERATIONS	3,050	5,000
MILITARY OPERATIONS	2,588	3,000
TOTAL AIRCRAFT OPERATIONS	275,104	535,000

“Operation” refers to either a takeoff or a landing

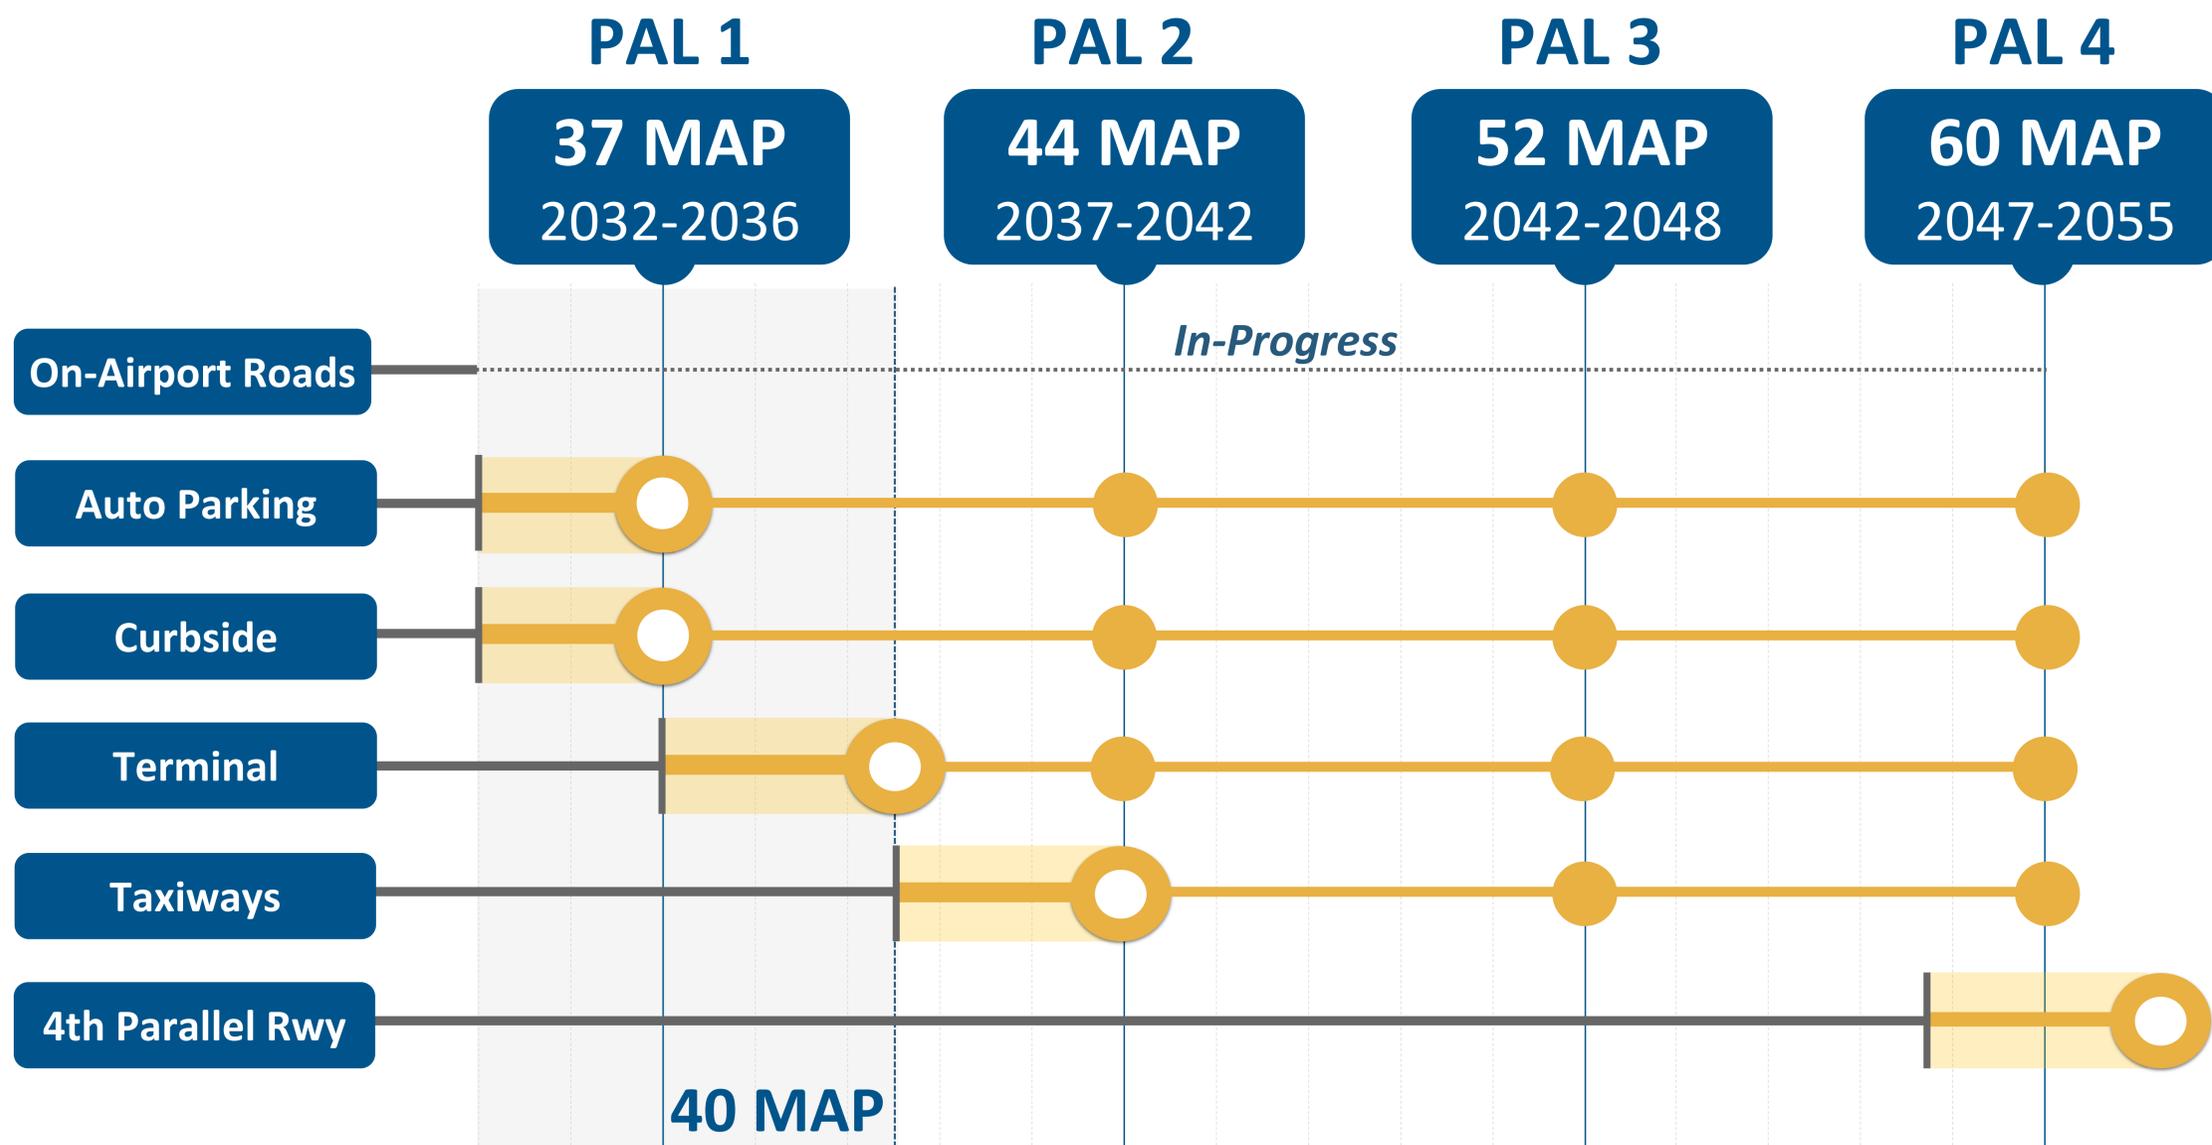

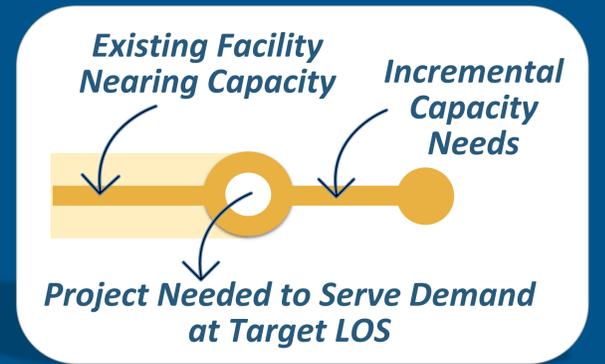

Overview of Facility Requirements

- Evaluated requirements for airside, terminal, landside, and support facilities
- Quantified future needs based on forecast
- Compared needs vs. existing facilities
- Requirements analysis will guide alternatives analysis and land use planning

BNA[®] Master Plan

Major Development Needs

Other Key Requirements Findings

Airside

- 11,500' of runway length to meet long-term needs

Support Facilities Requirements

- MNAA support facilities at PAL 1
 - e.g. airport maintenance, administration, operations, centralized receiving and distribution center
- Airline support facilities at PAL 1
 - e.g. fuel facilities, ground service equipment storage

Landside Requirements

- External coordination to maintain safe & efficient airport access
